# **PUBLIC NOTICE**

## **Proposed Kirby In-Situ Oil Sands Project**

### **Alberta Environment, Environmental Protection and Enhancement Act**

Take notice that Canadian Natural Resources Limited has published and submitted an Environmental Impact Assessment report (EIA) to Alberta Environment for its proposed Kirby In-Situ Oil Sands Project (Kirby Project). The project will utilize Steam Assisted Gravity Drainage (SAGD) as the primary bitumen recovery process. The proposed development leases are located approximately 85 kilometres northeast of Lac La Biche in Township 73, Ranges 7 and 8, and Township 74, Range 8, W4M. The Kirby Project will involve:

- Construction of a stand-alone bitumen processing facility, which will have a capacity of 7,155 m<sup>3</sup>/d or 45,000 Barrels of Oil per Calendar Day (bbl/cd) of bitumen;
- Construction of 12 well pads with associated wells and equipment;
- Use of Mechanical Vapour Recompression (MVR) to enable improved water use efficiencies, minimize makeup water volumes and reduce waste product streams; and
- Development or improvement of associated infrastructure, including access roads, power and pipelines.

To obtain additional information or a free copy of the EIA or summary of it, contact:
