

# Tips from our Campus Team

*Our focus is to invest in the future, and that starts with you! At Canadian Natural we offer diverse roles which allow our students to learn beyond the classroom. From operations across Western Canada and overseas to our corporate office in the heart of downtown Calgary, we strive to be progressive in our opportunities, while keeping true to our core values that have made us leaders in the energy sector. We look for talent year round and we are eager to meet the leaders of tomorrow!*

## **Here are the top 5 tips from our Campus Team to help you along the application process:**

1. Attend one of our Campus Events, connect with one of our Campus Advisors and gain a direct insight into the opportunities at Canadian Natural. Be sure to research both the company and the role you are interested in applying for, and come prepared with questions.
2. Be your greatest advocate, and showcase your talent. This is not the time to be modest, know your strengths, tell us why you're passionate about the role and express your desire to learn!
3. Target and customize your cover letter and resume to the roles that fit you best. Do you have a compelling hook in your cover letter? DON'T use the same cover letter for every application.
4. Spend time to properly format your resume, and ensure you are sending the correct documents required for the role. Due to the high volume of applicants, a well-organized resume can make a big difference in your application process.
5. Keep track and know your deadlines. Our main recruitment schedule is September and January, so ensure you are being proactive and checking on those important dates.
