(1) Calculated as product sales divided by respective sales volumes.

(2) Calculated as transportation expense divided by respective sales volumes.

(3) Calculated as royalties divided by respective sales volumes.

(4) Calculated as production expense divided by respective sales volumes.

(5) Calculated as product blending costs divided by respective sales volumes.

Note: All amounts expressed are in Canadian Dollars unless noted and per unit amounts are based on sales volumes.

Netback is a non-GAAP financial measure that represents the net cash flows provided from core activities after the impact of all costs associated with bringing a product to market, on a per unit basis. The Company considers netback a key measure in evaluating its performance, as it demonstrates the efficiency and profitability of the Company's activities. The netback calculations include the realized price non-GAAP ratio. Refer to the "Non-GAAP and Other Financial Measures" section of the Company's MD&A for the three and nine months ended September 30, 2026 dated November 4, 2026, for additional non-GAAP disclosure, including details on blending and feedstock.

Netback is a non-GAAP financial measure that represents the net cash flows provided from core activities after the impact of all costs associated with bringing a product to market, on a per unit basis. The Company considers netback a key measure in evaluating its performance, as it demonstrates the efficiency and profitability of the Company's activities. The netback calculations include the realized price non-GAAP ratio. Refer to the "Non-GAAP and Other Financial Measures" section of the Company's MD&A for the three and nine months ended September 30, 2026 dated November 4, 2026, for additional non-GAAP disclosure, including details on blending and feedstock.
